

## Company Profile

Critec Consult Limited is a privately owned totally independent security consultancy.

Our personnel have over 20 years experience in major security engineering projects in the military, government and private sectors, in the UK, Europe and Middle East.

Critec provide a personal consultancy service and adopt a holistic approach to security based on the selection of the appropriate electronic and physical measures, the development and adoption of robust procedures and effective human security training.

Whether the risk to your organisation is from terrorism, vandalism, theft or the acts of disgruntled employees, Critec can advise counter measures to manage or mitigate that risk with the minimum of impact to your legitimate business practices.

Our consultants are Chartered Engineers, Members of the Association of Security Consultants and the CCTV User Group.

Critec Consult provide totally independent advice on the following security related disciplines:

- Digital and Analogue CCTV
- Remote transmission and monitoring
- Intruder and perimeter protection
- Integrated systems
- Pedestrian and vehicular access control
- Control centre design
- Security infrastructure and support services
- Physical security
- Security policy and procedures
- Security training and maintenance

Critec are based in the North of England, but can undertake commissions in any part of the UK, Europe and most international locations
